GOOD NEWS

JP3 BUSINESS AT ITS HIGHEST IN THE PAST DECADE

As illustrated below, JP3 registered this year an unprecedented number of orders for both serial boats (complete rudder systems) and One Off boats.

Orders under manufacture in the factory include the largest mast bearings ever manufactured (20% larger than JP3 2005 mast bearings supplied to the 'Maltese Falcon'.

THANK YOU!

FOR YOUR CONFIDENCE IN OUR 'SAVOIR FAIRE'.

+ THE BEST OFFERS FOR THE PRODUCTION BOATYARDS

Producing no less than **1200 rudder shafts / year** (70% completed with composite blades) JP3 supplies most of production boatyards all over the world.

- Because of these high volumes, JP3 negotiates raw materials and is able to offer you the best solutions at incomparable budgets.
- Composite rudder tubes instead of aluminium ones for the same budget .

2013-2014

+ REFITTED WITH JP3 PARTS

SODEBO

In the Multiplast workshops, ex *Géronimo* was turned into an optimized trimaran able to be sailed singlehanded. The entire steering system was reconfigured to accommodate three new rudders. **Rudder bearings and steering system were all supplied by JP3.**

BALTIC 147' 'Visione'

New set of **JP3 Type 4 rudder bearings** for the High performance 2002 launched Baltic Yacht 'Visione'. Originally fitted with JP3 rudder bearings, the 44.8M Reichel Pugh Sloop Visione is a committed and successful contender on the Superyacht Regatta circuit.

New RAGAMUFFIN 100'

Fischer's team will work quickly now to ready the 100' boat for the Cruising Yacht Club of Australia's Rolex Sydney Hobart Yacht Race, the 70th edition of the race. Water ballasted, the new super maxi boasts now twin rudders, for which **JP3 supplied self aligning rudder bearings and the rack for the new steering system.**

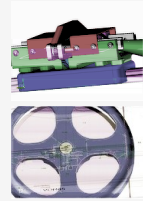

+ RACING YACHTS

JP3 developed a custom 'car and track' travelling system for the VOR 65'. **100% of the fleet** is fitted with this custom steering system and **JP3 type 47 and 49 rudder bearings**.

Twin rudder racing yachts need **TOE IN/OUT** adjustment to minimize drag and maximize boat speed. JP3 designed a **TOE IN SYSTEM** for the VOR70 Groupama 4 which can be constantly adjusted from the deck with a knob. VOR65 OD adopted **JP3 TOE IN** system.

Most of the 91 boats at the departure of the 3500 mile solo race Atlantic are fitted with JP3 parts.

100% of the **Ultime Class**

80% of the **Class 40'**

!!!!!! BREAKING RECORDS BEARINGS !!!!!

7 DAYS 15 HOURS 8 MINUTES 32 s for 3542 miles.

Congratulations to Loïck Peyron on Maxi Solo Banque Populaire VII

+ + + NEW DEVELOPMENTS

Our rudder bearings range keeps evolving along with the nautical industry:

Designed specifically for **motor yachts** with metallic rudderstocks the **Type 5** bearing is an **all steel heavy-duty spherical roller bearing**.

Designed for pivoting blades configurations, our new **Type 6** bearings fit some **IMOCA 60'**.

Our new **Type 7** bearing : the right solution for boatbuilders offering retractable rudders and centerboards.

+ TO COME...

JP3 have been at the forefront of the development, design and manufacture of innovative rudder bearings solutions .

JP3 have been involved in several AC72 T-Foil rudders, developing and providing custom high axial loads rudder bearings and is increasingly asked for these bearings for both inshore and offshore boats.
